ARIAU AMAZON TOWERS

LIVE THIS DREAM,
FEEL THIS EMOTION

"Imagine a hotel built among Amazon treetops:
catwalks 70 feet up leading from a great circular dining
room of polished tropical woods, a bar like an eagle's nest,
a honeymoon suite built 110 feet up a mahogany tree, and
friendly monkeys, macaws, sloths, and parrots scampering,
fluttering, and dangling all over the place."

Conde Nast Traveler, March 1996
"25 Extraordinary Places Worth That Extra mile"

The best way to discover and explore the Amazon forest in total freedom, security and comfort. In 1987, founder Dr. Francisco Ritta had a vision. To ask the primordial inhabitants of the Amazon, the “caboclos” and indians, to determine what would be the best architecture, structure and design for a hotel in the middle of the rain forest.

From the knowledge the Amazon’s indigenous people acquired over centuries arose the spectacular Arian Towers. It is not by chance that we link our name to the planet’s largest tropical rain forest.

Whilst offering an absolutely unique holiday experience to all our guests, Arian is also

committed to preserving the environment. The entire structure of the lodge complex was built using certified wood, without damaging the natural habitat of the area.

We also believe in pursuing sustainable tourism, which guarantees complete harmony between the locals, the environment and our guests.

PARADISE ON EARTH

Arian Creek, the beautiful region where we built, is located in front of the Anavilhanas Archipelago, a National Park and Ecological Reserve with 380 different islands, making it the largest fresh water archipelago in the world.

Arian is located 35 miles from Manaus on the confluence of the Rio Negro River, a region with the greatest biodiversity on earth.

THE TREE TOP HOTEL

If you ever associated an eco-tourism experience with uncomfortable accommodation, poor service and a slimming diet, you were wrong.

Arian Amazon Towers Hotel Presents You With:

- A lodge complex built at the level of the rainforest canopy with over 3 miles of catwalks offers visitors the chance to live within the fauna and flora of the Amazon region.
- Secluded and private Tarzan Houses far from the lodge’s main structures are family sized or personalized, and built on top of giant nut trees.
- Swimming pools at canopy level, where you can relax and enjoy the scenery, experience the birds’ singing, the howler monkey calls and raccoons strolling by.

- 290 apartments, with or without air conditioning
- Full pension schemes offering local dishes which are a “plat de resistance” like the exotic fish Tucunare as well as tropical fruits like cupucu, graviola and mango. International cuisine also available for the less adventurous.
- Friendly bi-lingual staff who will escort you from Manaus and attend to all your needs.

- Transportation to Arian on the hotel’s private boat (according to your chosen package).
- Daily excursions with specially trained guides to native villages, on jungle treks, canoeing through small creeks and through the flooded forest and night explorations where you will find yourself feeling much more observed than the one doing the observing.
